NORDIC CLIMATE FORUM FOR CONSTRUCTION

Join us for a discussion about harmonization of building regulation and low carbon emissions in the Nordic Countries, and what is next.

The Nordic ministers decided in 2018 that harmonization of building regulation should be strengthened. This led to the first Nordic Climate forum for Construction in 2019, which became the starting point of an effort towards Nordic harmonization for low carbon emissions from construction.

The climate forum is planned as a yearly event for discussions with policymakers and stakeholders from industry, the academia and the finance sector.

Join us for discussions, debates, and exchange of knowledge on LCA methods, data, tools and policies.

Organized by

**Nordic
Co-operation**

Trafik- og Byggestyrelsen
Danish Transport and Construction Agency

**SWEDISH
LIFE CYCLE
CENTER**

Because of the COVID-19 will this year's forum be an interactive webinar.

Nordic Climate forum for Construction

Date: Thursday 27th of August 2020

The Danish Transport, Construction and Housing Authority in collaboration with the Nordic building authorities, Nordic Council of ministers, and Swedish Life Cycle Center invite policy-makers, academia and the construction industry to participate in the work on Nordic harmonization on climate emissions. We expect about 100+ participants and hope for a good representation from all of the Nordic countries. The language of the event will be English.

Purpose – to have a dialog about the Nordic approach for steering the climate impact from the building environment in order to reduce the construction industry's climate emissions.

Objective – getting a common picture of the latest situation in the Nordic countries when it comes to regulation on climate impact from the built environment from a life-cycle perspective. Get inputs on the work that has, and will be done, and to understand the needs and gaps of the authority, academia and industry.

Registration - Please register for the forum by the following link:

Program

10:00 Opening words

- *Lise Aaen Kobberholm, Deputy Director at the Danish Transport, Construction and Housing Authority*
- *Moderator Maria Rydberg, project manager at Swedish Life Cycle Center*

10:10 Status and current issues from authority

- *Anders Jensen, project coordinator at the Danish Transport, Construction and housing authority*

10:25 Status and current issues from industry

- *Christine Collin, Senior Sustainability Consultant at Rambøll*

10:40 Status and current issues from academia

- *Harpa Birgisdottir, Senior Researcher, Department of the Build Environment, Aalborg University*

10:55 Coffee break

11:05 Nordic ministers give their greetings – Video

11:15 Nordic Database presentation of project

- *Matti Kuittinen, Senior Advisor, Ministry of the Environment of Finland*

11:40 Nordic regulation presentation of upcoming regulation in Sweden

- *Kristina Einarsson, Expert Environment and Climate Project manager, National Board of Housing, Building and planning*

12:05 Lunch break

12:50 Introduction to roundtable discussions

- *Moderator Maria Rydberg, project manager at Swedish Life Cycle Center*

13:00 Roundtable discussion 1 – Nordic climate database

13:50 Coffee break

14:00 Insights from Climate KIC og COWI/Arkitem– Video

14:10 Roundtable discussion 2 – Nordic regulation

15:00 Insights from Norwegian Green Building Council – Video

15:10 Conclusion and way forward

- *Moderator Maria Rydberg, project manager at Swedish Life Cycle Center*
