Swedish Life Cycle Center & Swedish Platform for the Life Cycle Perspective

Dear reader,

The aim of this newsletter is to give you the latest news from Swedish Life Cycle Center & Swedish platform for the life cycle perspective and the opportunity for you to get involved in our networking activities.

LATEST NEWS

Just before the summer holiday, the center together with the project "[Swedish platform for the life cycle perspective](#)" arranged a seminar at Almedalen "How environmentally friendly are electric vehicles? With a life cycle perspective we can get the answers!" [The seminar is available here](#) (In Swedish). The overall aim was to highlight the life cycle perspective and how it is applied in the field of electric vehicles. The seminar was well attended, despite the storm outside, and the panelist did a great job to describe their view on this topic from their perspectives.

In August, the Swedish Energy Agency invited Swedish Life Cycle Center and Vattenfall to a seminar at the Swedish Energy Agency to present the project "Swedish platform for the life cycle perspective, to

introduce the life cycle perspective and to learn from Vattenfall how the life cycle perspective and life cycle assessment can be applied in decision making, [read more here](#).

This newsletter will give you the latest update from us and invite you take part in our activities!

/ Sara Palander, Director, Swedish Life Cycle Center

Almedalen 2019

Swedish Life Cycle Center visited Visby and the Almedalen Week for a few days and arranged the seminar "How environmentally friendly are electric vehicles? With a life cycle perspective we get the answers!". The discussion took place at the Sustainability Arena and was arranged as a part of the Swedish platform for the life cycle perspective. Around 100 audiences were there to find out more about how life cycle assessment creates opportunities for a sustainable vehicle fleet.

Scania is joining the Swedish Life Cycle Center

Welcome Scania to Swedish Life Cycle Center!

Scania is a global provider of transport solutions, including trucks and buses for heavy transport applications combined with an extensive product-related service offering and leading provider of industrial and marine engines.

- We utilizes LCA in concept and product development to better understand the

possibilities in decarbonisation of operations, products and provide input to designers.

From Scania's perspective, being a partner in the center gives us the chance to work with the industry and academic partners on large scale projects. The center provides deeper insight in LCA methodology and modeling which contributes to future industry projects with highest potential of environmental reductions.

CALENDAR

Projektworkshop SCOPES - Minska komplexiteten i miljösystembeskrivningar

Välkommen att delta i en workshop där du som har kompetens inom och intresse för att förenkla miljö- och hållbarhetsstudier hjälper till att undersöka om det går att inom ISO 14000-familjen harmonisera hur systemgränser kan dras och beskrivas för några vanliga och viktiga miljö- och hållbarhetsstudier.
