QUESTIONS: lifecyclecenter@chalmers.se
FOR WHOM: For partners in Swedish Life Cycle Center.

Bengt Steen, Professor Emeritus
at Chalmers University of Technology.

CONTENT:

Join this webinar and get an update on the latest progress of the work towards the new ISO standard 14008 on monetary valuation of environmental impacts and related environmental aspects.

The area of monetary valuation of environmental impacts and natural resources is huge and complex and a common framework aims to ensure a higher degree of transparency regarding numbers and how impacts and aspects have been valued in monetary terms. The process to start up a common framework is a result from the work within Swedish Life Cycle Center and its partners with external funding from VINNOVA Sweden's innovation agency and Swedish Energy Agency. Bengt Steen is chairing the work and will in this webinar give you an introduction to the new ISO standard and updates from the latest ISO Technical Committee meeting in Halifax Canada and the work forward.

This webinar is being arranged within the project Swedish Platform for Life Cycle Perspective, funded by Swedish Energy Agency. The project is managed by Swedish Life Cycle Center and aims to establish a national collaboration platform for the advance of applied life cycle thinking.

There will also be time for questions.

Welcome to join this webinar!
